TABLE OF CONTENTS

INVITED PAPERS BY TOPIC

I. ECONOMIC STATISTICS IN THE AGE OF AUSTERITY: CAN QUALITY AND RELEVANCE BE MAINTAINED AS BUDGETS SHRINK?

Organizer/Chair: COURTENAY M. SLATER, CEC Associates

Economic Statistics in an Age of Austerity. JANET L. NORWOOD, Bureau of Labor Statistics 1

Census Bureau Economic Statistics—Data Quality, Budget Austerity, and Other Dimensions of Change. CHARLES A. WAITE, Bureau of the Census 3

Remarks for Panel on Federal Statistics in an Age of Austerity. ALLEN H. YOUNG, Bureau of Economic Analysis 7

II. NEW DEVELOPMENTS AND PROBLEMS IN THE CLASSIFICATION OF INDUSTRIAL ACTIVITY

Organizer: JOEL C. POPKIN, Joel Popkin and Company
Chair: THOMAS R. FENWICK, Department of Commerce

Healing the SIC: The 1987 Standard Industrial Classification Revision. PAUL BUGG, Office of Management and Budget 9

International Comparability of Industry Classification Systems. VITO NATRELLA, JOEL POPKIN, Joel Popkin and Company 13

Implementing the Revised Standard Industrial Classification for the 1987 Economic Censuses. ROGER H. BUGENHAGEN, Bureau of the Census 20

III. AFTER-TAX INCOME DISTRIBUTIONS: SOME METHODOLOGICAL CONSIDERATIONS

Organizer: WENDY ALVEY, Internal Revenue Service
Chair: RALPH BRISTOL, U.S. House of Representatives

Estimating After-Tax Income of Households, Using the March Current Population Survey. CHARLES T. NELSON, GORDON W. GREEN, JR., Bureau of the Census 27

Estimating After-Tax Income Distributions Using Matched IRS-CPS Data. PHILIP CLARK, Internal Revenue Service 37

Discussion. WILLARD L. RODGERS, University of Michigan 47

Discussion. EDWARD C. BUDD, Pennsylvania State University 49

IV. APPLICATIONS OF STATISTICS TO MARKETING PROBLEMS

Organizer: JACK C. LEE, Bell Communications Research
Chair: DARIUS J. SABAVALA, Bell Communications Research

On a Family of Data-Based Transformed Models Useful in Forecasting Technological Substitutions. JACK C. LEE, K.W. LU, Bell Communications Research 52

Applications of Density Estimation in Marketing. ROLAND T. RUST, University of Texas at Austin 60

V. MODEL SELECTION AND INFERENCE IN TIME SERIES

Organizer: ROBERT KOHN, University of Chicago
Chair: DAVID F. FINDLEY, Bureau of the Census

Smoothing and Signal Extraction in Nonstationary Models. CRAIG F. ANSLEY, ROBERT KOHN, University of Chicago 62

Random Effects and the Kalman Filter. RICHARD H. JONES, University of Colorado 69

Discussion. WILLIAM R. BELL, Bureau of the Census 76

VI. SMOOTHING TECHNIQUES IN STATISTICS

Organizer: DAVID F. FINDLEY, Bureau of the Census
Chair: CLIFFORD H. SPIEGELMAN, National Bureau of Standards

A General View of Statistical Smoothing. D. MICHAEL TITTERINGTON, University of Glasgow, Scotland 79

Partial and Interaction Spline Models for the Semiparametric Estimation of Functions of Several Variables. GRACE WAHBA, University of Wisconsin–Madison 85

VII. STATISTICAL STUDIES OF EXCHANGE RATE BEHAVIOR

Organizer/Chair: G.S. MADDALA, University of Florida

On the Equality of Real Interest Rates: Dollar/Deutsche Mark, 1975–1985. KAJAL LAHIRI, MARK ZAPOROWSKI, State University of New York–Albany 92

A Factor Analytic Approach to Foreign Exchange Speculation. ROGER D. HUANG, University of Florida; HOJE JO, University of New Mexico 96

Rational Expectations, Random Walks, and Monetary Models of the Exchange Rate. FRANCIS X. DIEBOLD, Board of Governors of the Federal Reserve System 101

CONTRIBUTED PAPERS BY TOPIC

I. STOCKS, COMMODITY FUTURES, RISK, AND IRA'S

Chair: DONALD LUERY, Bureau of the Census

Inference for Jump Diffusion Stock Prices. DAVID K. PICKARD, Queen's University; PETER J. KEMPTHORNE, Sloan School of Management, Massachusetts Institute of Technology; ARSHAD R. ZAKARIA, Harvard Business School 107

Tests of the Efficiency of Commodity Futures in a Multi–Contract Framework. GIORGIO CANARELLA, STEPHEN K. POLLARD, California State University–Los Angeles 112

Empirical Analysis of Factors Influencing IRA Establishment. MAURICE PFANNESTIEL, Wichita State University 117

Comparative Performance of the Growth–Optimal Portfolio Criterion and Mutual Funds, 1973–1982. L.B. PULLEY, College of William and Mary; THOMAS W. EPPS, University of Virginia 121

II. BAYESIAN ANALYSIS AND STATISTICS IN JURISPRUDENCE

Chair: EDWARD GBUR, Bureau of the Census

Comparing Regression Parameters in the Case of Heteroscedasticity. ANDREW W. BRAUNSTEIN, Iona College 127

On the Sensitivity of Posterior to Prior in Bayesian Analysis. JOHN L. MARYAK, JAMES C. SPALL, Johns Hopkins University 131

The Posterior Probability as a Function of Subsets of Data. JAMES C. SPALL, Johns Hopkins University 135

Probability and Liability: Statistics in Product Liability Litigation. HERBERT I. WEISBERG, Legal Statistics 140

Why Use Statistical Evidence in Antitrust Litigation? CHAIHO C. WANG, Department of Justice 146

III. TIME SERIES METHODOLOGY, I

Chair: CRAIG F. ANSLEY, University of Chicago

Seasonal Adjustment Without Too Much a Priori Economic Theory. ERIC GHYSELS, University of Montreal 150

Scalar and Multivariate Increasing Horizon AR Modeling and Prediction. WILL GERSCH, University of Hawaii; MICHAEL SKLARZ, Locations, Incorporated 154

Interpolation of Stock and Flow Data Observed at Different Frequencies. PETER ZADROZNY, Bureau of the Census 160

On the Relationship Between Certain Kalman Filter Models and Exponential Smoothing Models. NANCY J. KIRKENDALL, Energy Information Administration 165

IV. TIME SERIES METHODOLOGY, II

Chair: ROBERT MILLER, University of Wisconsin–Madison

Stationarity Transformations in Vector Autoregressions. DAVID A. DICKEY, North Carolina State University 171

Exact Moments of the Sample Autocovariances of a Pure Seasonal Random Walk. ALAIN LATOUR, University of Quebec; ROCH ROY, University of Montreal 175

The Sample Autocorrelation Function of Some Seasonal Nonstationary Time Series Models. TERESITA S. SALINAS, Washburn University; STEVEN C. HILLMER, University of Kansas 180

Specification of Mixed Stationary and Nonstationary Autoregressive–Moving–Average Models. MUKHTAR M. ALI, University of Kentucky 183

On the Lagrange Multiplier Test for Autoregressive–Moving Average Models. GRETA M. LJUNG, Massachusetts Institute of Technology 187

Diagnostic Checking vs. Overfitting: Test of ARIMA Models. SUFI M. NAZEM, University of Nebraska–Omaha 190

V. STATISTICS IN BUSINESS SCHOOLS

Chair: GEORGE C. TIAO, University of Chicago

A Workshop Report on The Curriculum: Basic Statistics Course. SAMPRIT CHATTERJEE, New York University 196

Curriculum: Industry Perspective for Making Statistics More Effective in Schools of Business. WILLIAM J. HILL, Allied–Signal Incorporated; BENJAMIN F. KING, JR., Educational Testing Service 198

Conference Report: Section on Statistical Computing and Graphics. PETER E. ROSSI, University of Chicago; ROBERT MILLER, University of Wisconsin 201

Making Statistics More Effective in Schools of Business: Workshop III—Quality and Productivity Improvement Summary Report. JOHN NETER, University of Georgia; EDWARD BRYANT, Westat, Incorporated 206

Making Statistics More Effective in Schools of Business: Interdisciplinary Cooperation. ROBERT HAMADA, University of Chicago; JAMES M. PATELL, Stanford University; RICHARD STAELIN, Duke University; WILLIAM E. WECKER, University of California, Davis 208

Making Statistics More Effective in Business Schools: Time Series Analysis and Forecasting Workshop. STEVEN C. HILLMER, University of Kansas; PAUL NEWBOLD, University of Illinois 214

Discussion. HARRY V. ROBERTS, University of Chicago 216

VI. STATISTICAL METHODS IN BUSINESS AND ECONOMICS

Chair: KIRK M. WOLTER, Bureau of the Census

From Mailroom to Boardroom: Statistical Methods Throughout a Business. DENNIS P. BRADY, Union Carbide Corporation 218

Verification of FASB 52's Functional Currency Determination: An Experiment. STEVEN A. FISHER, University of Akron 220

An Iterative Joint Estimation Procedure Accommodating Interdependency Between Dichotomous Dependent Variables. TSU-TAN FU, JAMES E. EPPERSON, University of Georgia; JOSEPH V. TERZA, Pennsylvania State University; STANLEY M. FLETCHER, University of Georgia 223

Reconsidering Inference in Conjoint Analysis. ALAN E. GELFAND, University of Connecticut 229

Interprovincial Migration: Economic Distance and Socioeconomic Characteristics. ROBIN ROWLEY, McGill University; RENUKA JAIN, Worcester State College 234

VII. ENERGY RESEARCH

Chair: PAUL G. WAKIM, American Petroleum Institute

Bootstrap Evaluation of the Linear Regression Models. INDERJIT KUNDRA, Energy Information Administration 240

Robust Regression Methods: More Positive Attributes. ANTHONY E. BOPP, James Madison University 245

Divisia Quantity and Price Indexes Electric and Nonelectric Energy for the U.S. Manufacturing Sector. KERN O. KYMN, West Virginia University; MAHMOOD MOGHIMZADEH, College of Saint Rose 249

Fuel Choice Decisions in the Commercial Sector of the Northwestern United States. RUTH J. MADDIGAN, Economic System Analysis, Incorporated; DANIEL M. HAMBLIN, Battelle Columbus Division; ROBERT A. MURDOCK, Dartmouth University 253

On Measuring Energy Input, Quality and Elasticities. SANG V. NGUYEN, STEPHEN H. ANDREWS, Bureau of the Census 259

VIII. ECONOMETRICS

Chair: ANNE M. WAKIM, Bureau of the Census

Removing Business Restructuring From Data on Startups and Closures. CATHERINE ARMINGTON, Applied Systems Institute, Incorporated 265

A Regional Analysis of Labor's Share of Product Value. THOMAS CARROLL, University of Las Vegas, Nevada; ROBERT DEAN, Memphis State University 270

The Design and Structure of Econometric Revolution: Classical, Neo-Classical and Modern Econometrics. TEJ K. KAUL, Western Illinois University 273

Price and Distributional Effects of Introducing VAT into the Republic of China. AN-LOH LIN, Chung-Hua Institution for Economic Research 277

Is American Manufacturing Creating Jobs Again? MARJORIE ODLE, CATHERINE ARMINGTON, Applied Systems Institute, Incorporated 283

Ambient Particulate Levels and Capital Expenditures: An Empirical Analysis. IVY E. BRODER, American University 288

IX. QUALITY CONTROL, PRODUCTIVITY, AND COST

Organizer/Chair: HARVEY A. SCHWARTZ, Bureau of the Census

Quality, Productivity and Costs. MAHESH CHANDRA, JOHN E. ULLMANN, Hofstra University 294

Centralized Inventory When Demand is Uncertain. C. ZACHARY GILSTEIN, Bell Communications Research; PAUL S. HORN, University of Cincinnati 299

Productivity and Foreign Competition in the Steel Industry. YEW-KY KIM, Western Illinois University 304

Simultaneous Estimation of Demand, Supply, and Production Functions Under Market Disequilibrium. SHIGETAKA MIYAZAKI, S. LARRY LYU, AT&T Communications 309

Time Series Modeling for Statistical Process Control. LAYTH ALWAN, HARRY V. ROBERTS, University of Chicago 315

Effect of Participative Management on Group Productivity. C.R. ANDERSON, C.P. KARTHA, University of Michigan–Flint 321

X. FORECASTING

Chair: SANDRA K. McKENZIE, McKenzie Associates

Testing for Serial Correlation in the Presence of ARCH. FRANCIS X. DIEBOLD, Board of Governors of the Federal Reserve System 323

Time Series Analysis and Econometric Models: A Nested Multi–Country Forecasting Comparison Exercise. JACQUES RAYNAULD, Ecole des Hautes Etudes Commerciales, Montréal 329

The Effect of Trends in Leading Series Upon Forecasts with Regression Equations. MYRON MELNYK, Kent State University 335

Forecasting Time Series Exhibiting Increasing Seasonal Variation by Using Winters' Method Motivated Box–Jenkins Models. BRUCE L. BOWERMAN, Miami University 340

Forecasting and Regime Changes. GERALD NICKELSBURG, FREDERICK THUM, University of Southern California 346

XI. MONEY, CREDIT, AND FINANCE

Organizer/Chair: ROBERT B. LATTA, Energy Information Administration

Unanticipated Money Growth and Output: A Quasi–Rational Expectation Approach. GIORGIO CANARELLA, STEPHEN K. POLLARD, California State University–Los Angeles 352

Non–Nested Tests of Banks' Credit Allocation Policy Models with Small Sample Adjustments. RODOLFO G. LEDESMA, King's College 358

Factors of Variance in Calculating a Discount Rate for Project Analysis. JAMES W. VAN DYKE, PATRICIA HU, Oak Ridge National Laboratory 364

XII. SEASONAL ADJUSTMENT

Chair: WILLIAM R. BELL, Bureau of the Census

Optimal Time Horizon for ARIMA Extrapolation. ESTELA BEE DAGUM, GUY HUOT, MARIETTA MORRY, KIM CHIU, Statistics Canada 369

Alternative Seasonal Adjustment Forecast Horizons and Methods for the Producer Price Indexes. JAMES A. BUSZUWSKI, Bureau of Labor Statistics 373

The Seasonal Adjustment Procedures for the Consumer Price Indexes: Some Empirical Results. RAJ K. JAIN, Bureau of Labor Statistics 379

A Comparison of Model–Based and X–11–Arima Seasonal Adjustment. STUART SCOTT, Bureau of Labor Statistics 385

Sliding Spans Diagnostics for Seasonal and Related Adjustments. DAVID F. FINDLEY, BRIAN C. MONSELL, HOLLY B. SHULMAN, Bureau of the Census 391

A Note on Exponentially Smoothed Seasonal Differences. LARS–ERIK ÖLLER, Ministry of Finance, Finland 397

XIII. STATISTICAL DISTRIBUTIONS AND TESTS OF HYPOTHESES

Organizer/Chair: INDERJIT KUNDRA, Energy Information Administration

Testing the Homogeneity of a Random Sample from Pareto Distribution. RAMALINGAM SHANMUGAM, University of Colorado–Denver 401

A Goodness-of-Fit Test Using Optimal Spacing. DALE UMBACH, M. MASOOM ALI, Ball State University 407

On the Multivariate Variance Components Model. YASUO AMEMIYA, Iowa State University 411

XIV. REGRESSION ANALYSIS: COLLINEARITY AND FORECASTING

Chair: LARS MUSS, Cornell University

Comparison on Estimators for Limited Dependent Variable Models. CHUNG L. HUANG, ROBERT RAUNIKAR, HSIANG-TAI CHENG, University of Georgia 415

Measuring Loss of Information Due to Multicollinearity. EHSAN S. SOOFI, University of Wisconsin-Milwaukee 419

Generalized Principal Components in Seemingly Unrelated Regressions. LAWRENCE C. MARSH, University of Notre Dame 423

XV. REGRESSION ANALYSIS AND APPLICATIONS

Chair: BRIAN C. MONSELL, Bureau of the Census

Principal Components Regression—Selection Rules and Application. ALEXANDER BELINFANTE, Federal Communications Commission; KEREN L. COXE, Washington, D.C. 429

Tests of Discrimination in Block Hiring. JOSEPH L. KATZ, Georgia State University 435

An Empirical Comparison of the Saaty Analytic Hierarchy Process (AHP) Method to the Aitken's Generalized Least Squares Procedure for Alternative Composite Sectoral Composition Estimates of Soviet Defense Expenditures. GORDON C. McMEEKIN, University of Connecticut 441

Bootstrapping a Random Coefficient Regression Model. K.R. KADIYALA, Purdue University; DENNIS OBERHELMAN, University of South Carolina 447

A Statistical Perspective on Efficiency Measurement Using Multiple Outlier Diagnostics. BILL L. SEAVER, KONSTANTINOS P. TRIANTIS, Virginia Polytechnic Institute and State University 451

XVI. SAMPLING PROBLEMS AND DATA ANALYSIS

Chair: PHILLIP A. CARTWRIGHT, University of Georgia

The Effects of Balancing on Finite Population Prediction. RICHARD W. ANDREWS, University of Michigan 457

Sample Size Selection for Pairwise Comparison of Means. NORMAN T. BRUVOLD, SHANKAR GANESAN, University of Cincinnati 461

Sampling Strategies in a Near Zero Defect Environment. E. SANIGA, University of Delaware; VICTOR R. PRYBUTOK, Drexel University 465

Focus on Nonprofit Charitable Organizations, 1982. DANIEL F. SKELLY, Internal Revenue Service 467

XVII. TIME SERIES APPLICATIONS

Chair: GRETA M. LJUNG, Massachusetts Institute of Technology

Measuring Expected Inflation: Further Tests in the Frequency Domain of a Proposed New Measure. HOUSTON H. STOKES, University of Illinois-Chicago 473

Is the Gibson Paradox a Myth? Coming Home from a Journey of Cycle. CHUNG CHEN, Washington State University; JEVONS C. LEE, University of Pennsylvania 478

A Canonical Variate Approach to the Analysis of Causality and Feedback in Multiple Time Series. KENNETH L. CAVANAUGH, Maharishi International University; WALLACE E. LARIMORE, Business and Technological Systems, Incorporated 484

Weighted Regression Analysis on Time Series Data. PAUL G. WAKIM, American Petroleum Institute 490

Legal Control of Drunken Driving: A Time Series Study of California Data. SUBHASH C. RAY, University of Connecticut 496

XVIII. FEDERAL SURVEYS

Chair: CHARLES A. WAITE, Bureau of the Census

Measurement and Coverage Problems in Estimating Value-in-Place for Federally-Owned Construction. RUTH BRAMBLETT, Bureau of the Census 502

Collection of New Data Types in the Current Employment Statistics Program. RICHARD J. ROSEN, JOHN B. FARRELL, Bureau of Labor Statistics 508

A Comparison of Alternative Estimators for Revised Monthly Import Levels. EDWARD GBUR, Bureau of the Census 514

Evaluation of the CD-ROM (Compact Disk-Read Only Memory) as a Means of Distributing Statistical Data. ROLAND H. MOORE, FORREST B. WILLIAMS, Bureau of the Census 520

Evaluation of Coverage and Response in the Manufacturers' Shipments, Inventories, and Orders Survey. ANNE WAKIM, Bureau of the Census 523

XIX. MODELING AND SIMULATION

Chair: EDWARD C. KOKKELENBERG, State University of New York-Binghamton

Modeling the Price Dynamics of a Risky Asset with Geometric Brownian Motion Driven by Jump Mean and Variance Processes. PETER J. KEMPTHORNE, Sloan School of Management, Massachusetts Institute of Technology 529

Further Analysis of Production in the Extractive Industry. WINSTON T. LIN, State University of New York-Buffalo 533

The Simultaneous Equation in the Presence of Discrete Endogenous Variables. STAVROS PERISTIANI, Queens College-City University of New York 539

An Extremely Large, Integrated Econometric System: Development, Forecasting, and Simulation. M. RAY PERRYMAN, Baylor University 545

Some Robustness Properties of Goodness of Fit Statistics in Covariance Structure Analysis. ALBERT SATORRA, University of Barcelona; PETER M. BENTLER, University of California-Los Angeles 549

A Weekly Model of the U.S. Economy. EVANGELOS O. SIMOS, University of New Hampshire; JOHN E. TRIANTIS, AT&T Bell Communications; DEMIRHAN YENIGUN, University of New Hampshire 555

XX. REGRESSION ANALYSIS: METHODOLOGY, I

Chair: PAUL P. BIEMER, Bureau of the Census

An Experimental Study of Estimators Associated with a Random Coefficient Regression Model. J.S. MEHTA, Temple University; R.Y. LEE, Naval Air Development Center; P.A.V.B. SWAMY, Federal Reserve System 561

Tests for Normality in Errors-in-Variables Regression Models. STEPHEN M. MILLER, Bureau of Labor Statistics 567

The Berry-Esseen Bound for OLS Estimators When Errors Are Autocorrelated. SUBHASH C. SHARMA, Southern Illinois University 572

Jackknife Tests for Heteroscedasticity in the General Linear Model. SUBHASH C. SHARMA, Southern Illinois University; CARMELO GIACCOTTO, University of Connecticut 577

Test of Log Linear Versus Linear in Least Squares and Robust Regression. VICTOR AGUIRRE TORRES, IIMAS-UNAM-Mexico; TERESA LOPEZ-ALVAREZ, Teléfonos de México 581

XXI. REGRESSION ANALYSIS: METHODOLOGY, II

Chair: SANG V. NGUYEN, Bureau of the Census

Detecting Heterogeneity of Intercept and Independent Variable in Regression. LALIT K. AGGARWAL, Drexel University; BOB PUCKETT 585

Use of Residual Errors as an Alternative to Dummy Variables in Nonlinear Regression. PURNELL H. BENSON, Rutgers University 592

Examination of the Cross-Effects Parameters in a Cross-Lagged Panel Analysis. STEVEN S. CARROLL, LAWRENCE S. MAYER, Arizona State University 595

Mixed Regression Estimator Under Misspecification. KRISHNA KADIYALA, Algoma University College 601

Regression with Unpaired Observations. MARTIN A. KOSCHAT, RICHARD A. YOUNG, Bell Communications Research 604

A Study of Robustness of the Compatibility Test for Mixed Estimators. CHIEN-PAI HAN, University of Texas-Arlington 608

CONTRIBUTED PAPERS—POSTER SESSION

The Distribution of the Quotient of Two Correlated Normal Random Variables. LEO A. AROIAN, Union College 612

Structural Changes in an Autoregressive Process. TOM S.T. AU, AT&T Bell Laboratories 614

The Median Polish as a Seasonal Time Series Forecasting Tool. JONAS V. BILENAS, Citibank; J. McMANUS, L. HIRIS, L. MEEHAN, Long Island University 620

A Survey of the Success of Executives Versus Birth Order. KAYLA COVINGTON, KRIS K. MOORE, Baylor University; CHARLOTTE SUTTON, Auburn University 623

The Effectiveness of Pre-Retirement Planning in Large American Corporations. JOE COX, KRIS K. MOORE, CARLOS MOORE, Baylor University 625

Bootstrapping in Least Absolute Value Regression: An Application to Hypothesis Testing. TERRY E. DIELMAN, ROGER C. PFAFFENBERGER, Texas Christian University 628

The Prediction Matrix: Its Properties and Role in Data Analysis. ALI S. HADI, Cornell University 631

Problems in Estimating the Navy's Permanent Change of Station (PCS) Move Requirements. ROBERT M. HOLMES, JR., SUSAN J. PINCIARO, U.S. Navy Personnel Research and Development Center 637

Loss Ratios, Loss Frequencies and the Rate Making Function. JAMES R. HUBBARD, DAVID O. SCHLENKE, GEORGE A. PERKINSON, National General Insurance Company 642

Logistic Regression Models for Credit Scoring. KEVIN J. LEONARD, THOMAS J. TOMBERLIN, Concordia University 648

Calendar Effects in Regression Analysis. MARK S. McNULTY, Kansas State University; WALLACE E. HUFFMAN, Iowa State University 652

A Needs Survey of the Qualifications for Managers of Information Systems. KRIS K. MOORE, REAGAN RAMSOWER, CARLOS MOORE, Baylor University 658

Computational Techniques and Examples of the Density and the Distribution of the Quotient of Two Correlated Normal Variables. DOLUN ÖKSOY, Alfred University; LEO A. AROIAN, Union College 660

The Sick-Out Statistical Approach to Circumstantial Evidence. DAVID L. QUIGG, Bradley University 664

Testing Forecasts Without Normality. WILLIAM C. QUINN 667
